Karen L. Wheeler
Deputy Secretary of State

WELCOME TO WYOMING'S ADMINISTRATIVE RULE SYSTEM

Welcome to Wyoming's Administrative Rules System where you will find comprehensive information pertaining to state agency rules! Created as part of the Governor's rules streamlining initiative, this integrated rules system provides a central location to access proposed, final and emergency state agency rules. Rules may now be searched by entering a key word or phrase. Advanced rule searches are also available using a variety of criteria.

Key features of the system offer state agencies and the public:

- A delivery system automatically sending rules packets electronically to the Governor, Attorney General, and Legislative Service Office – eliminating the paper delivery used in the past;
- The ability to locate content of proposed rules and provide public comment directly to the promulgating agency by using the public comment link on the website;
- The opportunity to subscribe to GovDelivery for notifications of emergency, proposed, and final rules.

The system has many help features available including:

- "News & Alerts" which are found on the user dashboard;
- A "Links" area where you can find FAQs and handy hints when seeking rule information;
- A Help tab where you can access many items including the User's Guide and Training Video; and,
- An online help file accessible via the "?" in the upper right-hand corner of your window.

On the public website, the system provides visual notice to users that proposed rules or emergency rules exist when searching current rules. Rule history is provided to view rulemaking actions on rule chapters.

We hope you find this system easy to use while still providing the information you are accustomed to finding! As you use the System, we encourage you to provide us with feedback and enhancement ideas. Please email us at Rules@wyo.gov.
